

Ask once. Savia follows through.

One voice for you.
A case that keeps its context.

“I don’t recognize this transaction.”

OUR FIRST USE CASE: TRANSACTION DISPUTES

Checked facts.

A saved next step.

Your problem keeps moving. You get on with your day.

CARD PROTECTION / COMPLETED ACTION

Confirm once. Savia blocks the owned card, writes a durable status, and rereads an independent receipt. Asking never writes. Foreign cards, missing consent, and tampered receipts are refused.

English summary: “The explanation helped.” Saved suggestions remain available.

Demo ledger. Same admission rules a production host would use.

Voice is the beginning. Follow-through is the product.

ELEVENAGENTS / COMMERCIAL VOICE REFERENCE

A compelling conversation

Expressive, responsive voice
Financial-services dispute showcase
Integrated speech and turn-taking

SAVIA / THE CONTINUING CASE

A case that keeps moving

Checked facts and ordered decisions
Explicit consent and saved receipts
Saved context and specialist perspectives

A familiar voice. A persistent case. A clear next step.

Two people. Ten days. A service the bank can inspect and control.

Reference: ElevenLabs — Eleven v4 Turbo in ElevenAgents

One customer voice. Ten teams behind it.

18 live together

Sandboxes in the tested foundation

Two completed reviewers

The customer path we recorded

One customer voice. Ten teams behind it. The architecture is ready to scale.

Evidence you can inspect. Choices a bank can control.

Policy, not the model, authorizes the card action.

live public API · card protection

Spanish + Portuguese: consent,
verified block and status on new login

DATA → PRODUCT DECISION

Historical links crossed customer ownership. New inquiries use owned transaction reads.

Savia + Banking MCP own the banking boundary. FLUJO keeps its generic interfaces; voice and models remain replaceable.

Make “I’ll look into it” a service customers can feel.

FOR THE CUSTOMER

Less chasing.

One guide keeps the context
and brings the next step back.

FOR THE BANK

Better prepared support.

Reviewed evidence and a clear
packet for the next handoff.

THE NEXT STEP

A bounded bank pilot.

Start with transaction disputes.
Measure value before scaling.

Ask once. Savia follows through.

Pilot measures: repeat contacts · helpful answers · handoff quality · cost per case
