

Ask once. Savia follows through.

One voice for you.

A network designed for up to 100 agents on your case.

“I don’t recognize this transaction.”

OUR FIRST USE CASE: TRANSACTION DISPUTES

Product vision.
Working prototype.

Your problem keeps moving. You get on with your day.

English summary: “The explanation helped.” Saved suggestions remain available.

Product journey shown above; human pickup and bank resolution are pilot integrations. Fictional UI capture.

Voice is the beginning. Follow-through is the product.

ELEVENAGENTS / COMMERCIAL VOICE REFERENCE

A compelling conversation

Expressive, responsive voice
Financial-services dispute showcase
Integrated speech and turn-taking

SAVIA / CASE ORCHESTRATION

A case that keeps moving

Persistent goal and saved context
Up to 100 agents in the swarm design
Bank-controlled data and model choices

A familiar voice. A persistent case. A network you control.

Comparison of product emphasis; no head-to-head benchmark or claim of exclusive capabilities.

Reference: ElevenLabs — Eleven v4 Turbo in ElevenAgents

One conversation. Up to 100 agents behind it.

100

team conversations

10 teams × (1 lead + 9 specialists)
Savia’s coordinator is separate.

LEAD + SPECIALISTS / SHARED EVIDENCE / INDEPENDENT REVIEW

Communicate

Native messages + fleet relay

Challenge

Shared board + peer review

Recover

Saved context; hold uncertain retries

Swarm design and deployed connector. Exact 100-agent customer completion remains to be qualified.

The bank controls the stack. The work leaves a trace.

TLS ingress · separated data and state · authority stays in Savia + Banking MCP

Self-hostable foundation · local open-weight model option · interchangeable MCP / model modules

300/300

correct FLUJO reference returns

300 queued 1k requests; repeat run
p50 273 s / p95 442 s

129 / 367

frontend / backend tests

Recorded frozen rc.1 checks
Build + ownership + recovery coverage

Run → tool → agent

execution visibility

FLUJO metadata statistics
Durations, tokens, failures, revisions

Benchmark: Qwen3.8-27B FP8 + vLLM on rented H100. Current demo: direct provider; FLUJO fleet is the integration target.

Case state persists; active audio resets after restart. Capacity is a workload result, not 300 simultaneous GPU generations.

Make “I’ll look into it” a service customers can feel.

FOR THE CUSTOMER

Less chasing.

One guide keeps the context
and brings the next step back.

FOR THE BANK

Better prepared support.

Reviewed evidence and a clear
packet for the next handoff.

THE NEXT STEP

A bounded bank pilot.

Start with transaction disputes.
Measure value before scaling.

Ask once. Savia follows through.

Pilot measures: repeat contacts · helpful answers · handoff quality · cost per case
